The Dispute & Scam Checklist

2. Downloadable Worksheets & Further Reading Hub

A. Worksheet: "The Dispute & Scam Checklist"

- **Purpose:** A digital "cheat sheet" for learners to keep on their phones to use during client negotiations.

5 Red Flags of a Scammer:

e.g. 5 Red Flags of a Scammer:

The client asks to move the conversation to Telegram or WhatsApp before a contract is started.

The client asks for a "test job" that is actually a full piece of work for free.

The client offers to pay via gift cards or crypto instead of the platform's verified system.

The job description is vague and offers a suspiciously high rate for very little work.

The client has no "Verified Payment" shield and a history of poor ratings from other freelancers.

1. The client asks to move the conversation to Telegram or WhatsApp before a contract is started on TeraWork. He says "platform fees are too high" to avoid protection.
2. The client asks for a free "test job" that is actually a full piece of work like "Design one full fintech app for free and if we like it we will pay you". A real test is 15 minutes max.
3. The client offers to pay via gift cards, crypto, or direct bank transfer instead of the platform's verified escrow system. I only accept platform payment as MAS ARTIFICS.
4. The job description is vague like "Need nice fintech app design" but offers \$500 for one screen - suspiciously high rate for very little work, often to collect designs.
5. The client has no "Verified Payment" shield and a history of poor ratings from other freelancers saying "did not pay after delivery". I will always check profile before accepting.

The 3-Step Dispute Protocol:

e.g. The 3-Step Dispute Protocol:

Stop work immediately and keep all further communication strictly on the platform's official chat.

Gather all proof of work (screenshots, drafts, and delivery receipts) as evidence.

Click the "Help" or "Dispute" button to bring in a professional platform mediator to resolve the issue safely.

1. Stop work immediately and keep all further communication strictly on the platform's official chat. No more WhatsApp or Telegram. This protects me and keeps evidence.
2. Gather all proof of work - Figma links with timestamps for Swift2Pay screens, screenshots of delivery, platform delivery receipts, and original brief from client.
3. Click the "Help" or "Dispute" button to bring in a professional platform mediator. I will submit evidence calmly with dates and deliverables and let the mediator resolve it safely without arguing.

GATEWAY Program

B. Further Reading Hub (PDF Links/Copy):

- **"The Retainer Revolution"**: A guide on how to price monthly services so you earn a "salary" instead of a "gig fee."
- **"Digital Ethics in the Age of AI"**: A one-page guide on the "Honesty First" approach to using generative AI tools like ChatGPT or Midjourney in professional work.
