

GATEWAY Program

The "AI-Powered Business Launchpad"

A. The AI Strategy Brief (Lesson 7.1):

- **The Personal Brand Philosophy:** Draft your "Verified Human" statement for your profile. Write your 2-sentence promise to clients regarding how you use AI to enhance speed while providing your own "Human Soul" and local context.

e.g. Personal Brand Philosophy (Human Soul Statement): "I use AI to handle data-heavy research and initial drafting so that I can focus on providing strategic solutions and creative 'Nigerian flavor' that no machine can replicate. I authorize every final word to ensure your brand remains authentic and human-centric".

I use AI to accelerate research, competitor analysis, and initial wireframing, allowing me to focus on human-centered design, empathy, and authentic Nigerian context. Every final output at MAS ARTIFICS is reviewed and authorized by me to ensure your product remains intuitive, original, and user-focused.

- **The Career Insights Report:** Use AI to analyze three job descriptions in your niche. List the 3 most requested "Global Power Skills" the AI identified.

e.g. The Career Insights Report (Global Power Skills): After analyzing three job posts for "Virtual Assistant" roles, the AI identified these trending skills:

- *E-commerce Platform Management (Shopify/Amazon).*
- *Strategic Email Marketing Automation.*
- *SEO-Optimized Content Ghostwriting.*

After analyzing 3 job posts for UI/UX Designer (Fintech) on Upwork and LinkedIn, AI identified:

1. Advanced Figma & Design System Management
2. User Research & Data-Driven UX Strategy
3. AI Workflow Integration & No-Code Handoff

GATEWAY Program

B. The Engine Room (Lesson 7.2):

- **The Power Prompt Library:** Create one "Master Prompt" for your niche using the **R-T-F (Role-Task-Format)** Framework.

Role:

*e.g. The Power Prompt (R-T-F Framework):
Role: "Senior Content Strategist for Tech Startups".*

Senior UI/UX Designer for Fintech Startups in Africa

Task:

Task: "Create a 4-week SEO content calendar for a Fintech blog".

Create a complete user flow and low-fidelity wireframe for a mobile savings app onboarding for first-time Nigerian users

Format:

Format: "A table with columns for Date, Topic, Primary Keyword, and Target Audience"

A table with columns for Screen Name, User Goal, Key UI Elements, and Pain Point Solved

- **The AI Workflow Map:** List the 3 tools you will use in sequence to finish a project.

Step 1 (Research): [e.g., ChatGPT]

e.g. Step 1 (Research): Use ChatGPT to summarize market trends from client transcripts.

Use ChatGPT and Perplexity AI to summarize fintech trends, analyze competitors like PiggyVest, and extract user pain points from client briefs.

GATEWAY Program

Step 2 (Creative/Visual): [e.g., Canva AI]

e.g. Step 2 (Creative): Use Canva AI to generate visual layout options for the project.

Use Figma AI and Uizard to generate initial wireframe layouts, component variants, and visual direction options.

Step 3 (Refinement): [e.g., Grammarly]

e.g. Step 3 (Refinement): Use Grammarly to polish the tone and ensure zero typos.

Use FigJam AI and Grammarly to polish UX copy, validate flow logic, and prepare a clean developer handoff.

C. The Ethical Shield & Impact (Lesson 7.3):

- **The Security Audit:** List 2 specific data privacy rules you will follow when using AI tools (e.g., never uploading client passwords).

e.g. Security Audit (Data Privacy Rules):

I will never upload client passwords, trade secrets, or internal financial reports to any AI tool.

I will only feed the AI generic project parameters or public data to protect client confidentiality.

1. I will never upload confidential client data such as passwords, BVN, or financial reports to any public AI tool.
2. I will only use anonymized, generic prompts and public data to protect client confidentiality at MAS ARTIFICS.

- **The AI Impact Report (Mock):** Based on your new workflow, estimate your efficiency gain

Manual Time (estimated): [e.g., 5 hours]

e.g. Manual Time: 5 hours (Research and drafting).

6 hours (Research, wireframing from scratch, and UX writing)

GATEWAY Program

AI-Enhanced Time (estimated): [e.g., 1 hour]

e.g. AI-Enhanced Time: 1 hour (Prompting and human refinement).

1.5 hours (AI-assisted drafting + human refinement and final design)

Strategy for "Found Time": How will you use the hours you saved to grow your business?

e.g. Strategy for "Found Time": I will use the 4 hours saved to source high-value clients on LinkedIn and perform peer reviews for my scaling partners.

I will invest the 4.5 hours saved into sourcing high-value clients on LinkedIn and improving my MAS ARTIFICS portfolio.
